

# News You can Use: October 2021

October 15, 2021

## Modern EUC Infobits Newsletter

News You Can Use!

Modern Device Management & Workforce Transformation

This newsletter contains a few items of interest that have caught my eye in the **Modern EUC**, Modern Device Management and Workforce Transformation space in the last month or so.

### Did you miss me?

After a few months break the Modern EUC News You can Use newsletter is back! Enjoy!

### This month's highlighted items:

- Windows 11 was **formally launched** on October 5, 2021. The upgrade is free, and Microsoft is currently releasing to consumer as an option in their upgrades. What are they requirement key differences and should businesses upgrade now? — Check [blog post](#) for a summary of what my thoughts are and what I tell my business customers.
- Microsoft Teams got some major upgrades in the past few months. From updates to presenter view, to Teams whiteboard to Team breakouts. Equally important several other Office 365 tools got some really good updates as well. Some good resources and [More details here](#)
- Did you know Skype is here to stay? – Yes this was a very unexpected announcement by the Microsoft Skype team – Skype for Business was retired back in August 2021, by the consumer version lives on – [Blog post here](#)
- Two very good quotes I came across this past month:
  - “... **digital transformation is really a CEO priority — more so than a CIO priority...**”
  - “**We are now in the stage of digital transformation where we are not just replacing existing tools — we are now enhancing them.**”
  - Check out this blog: [Digital Transformation has CHANGED! – Modern EUC Blog](#)

## Change can be managed with Ease!

The success of the Microsoft 365 platform is associated with how much the users use the features available within the different tools. End user awareness and education are critical to extracting and unlocking the full value out of the platform. Change and Adoption Management at the user level, now that we are working remotely or in hybrid more, have become incredibly important. I am very proud of the ability and success our team at Dell Technologies Services has been doing in helping customers in this area —
